VO MINH THUAN

BACKEND DEVELOPER INTERN

Email: minhthuan2018tv@gmail.com

Phone: 0961473006

Address: Long Truong, Thu Duc, HCMC

GitHub: https://github.com/vominhthuan2004

Information Technology student with a strong interest in backend development. Experienced in building RESTful APIs with Node.js and working with MongoDB. Eager to learn, improve, and contribute to real-world backend systems in a professional environment.

EDUCATION

HUTECH – Ho Chi Minh City University of Technology

- Major: Information Technology
- Specialization: Software Engineering
- Duration: 2022 – 2026
- Relevant coursework: Data Structures, Database Systems, Web Development

SKILLS

Programming Languages

- JavaScript
- Java

Backend Development

- NodeJS (Expressjs)
- Authentication - JWT, bcrypt
- Request/Response handling, Middleware

Databases

- MongoDB, MySQL, SQL Server, Basic Query

Tools & Technologies

- Git, GitHub, GitLab
- Postman (test API)
- Visual Studio Code, Apache NetBeans

Soft Skills & Language

- Teamwork, problem-solving, quick learner
- English: B1 (Intermediate)

PROJECT EXPERIENCE

Student Management System (RESTful API)

- Primary backend developer – responsible for implementing all Node.js APIs, database integration, and authentication logic.
- Built RESTful APIs for managing students, classes, and attendance with JWT-based authentication.
- Implemented attendance check-in using QR code and verification code; stored history in MongoDB.
- Structured backend using MVC pattern (controller–route–model), ensuring clean and maintainable code.
- Tested and debugged all APIs using Postman.

MedCare – Healthcare Management System

- Java Spring Boot, MVC, Spring Security, JPA
- Developed RESTful APIs for User, Product, Order, and HealthRecord management.
- Implemented role-based access control (RBAC) with Spring Security and global exception handling.
- Designed system following MVC architecture to separate concerns and improve maintainability.
